

Montexport Waste Management Group

Plastic Waste Catalogue

Ref. 04/2013

February 6, 2013

**Waste Management
Towards a more sustainable
Future**

Our business

In a world of increasing pressure on finite resources, historic resource management strategies of single-use, bury or burn are no longer tenable.

Montexport, after a thorough consideration of the needs, trends and opportunities in the recycling business, has developed a new business model for a sustainable future by combining a global business network, and its experience of more than 30 years in international trade.

The core business of waste management is the program designed to acquire, collect and transport the plastic scrap along with Operators of Municipal Solid Waste and Operators of Urban Solid Waste in European space, and subsequent distribution to several accredited recyclers worldwide.

Our Mission

Our approach to recycling is based on a belief that recycling is no longer an option: it is the way to the future.

Please find on the next pages the various types of plastics that we supply.

If you want more information and specifications, please contact our department for this business unit.

Plastic Waste for Sell

Please find beneath the various products we supply. If you want more information and specifications, please contact our department for this business unit.

Type of plastic polymer: Polyethylene terephthalate (**PET 01 Cristal**)

Common origins: Soft drink, water and salad dressing bottles; peanut butter and jam jars.

Packaging: Bales

Type of plastic polymer: Polyethylene terephthalate (**PET 01 Colour**)

Common origins: Soft drink, water and salad dressing bottles; peanut butter and jam jars.

Packaging: Bales

Type of plastic polymer: High-density polyethylene (**HDPE 02**)

Common origins: Water pipes, hula hoop rings, five gallon buckets, milk, juice and water bottles; grocery bags, some shampoo / toiletry bottles, etc.

Packaging: Bales and Big-Bags

Type of plastic polymer: High-density polyethylene (**HDPE 02**)

Common origins: Water pipes, hula hoop rings, five gallon buckets, milk, juice and water bottles; grocery bags, some shampoo / toiletry bottles, etc.

Packaging: Bales

Plastic Waste for Sell

Please find beneath the various products we supply. If you want more information and specifications, please contact our department for this business unit.

Type of plastic polymer: Polyvinyl chloride (PVC 03)

Common origins: Shutters, etc.

Packaging: Big-Bags

Type of plastic polymer: Low-density polyethylene (LDPE 04 98/2)

Common origins: Frozen food bags; etc.

Packaging: Bales

Type of plastic polymer: Low-density polyethylene (LDPE 04 90/10)

Common origins: Frozen food bags; etc.

Packaging: Bales

Type of plastic polymer: Polypropylene (PP 05)

Common origins: Reusable microwaveable ware; kitchenware; yogurt containers; margarine tubs; microwaveable disposable take-away containers; disposable cups; plates.

Packaging: Bales

Plastic Waste for Sell

Please find beneath the various products we supply. If you want more information and specifications, please contact our department for this business unit.

Type of plastic polymer: Oriented Polypropylene (**OPP 05**)
Common origins: Rice and Spaghetti bags.
Packaging: Bales

Type of plastic polymer: Polystyrene (**PS 06**)
Common origins: Egg cartons; packing peanuts; disposable cups, plates, trays and cutlery; disposable take-away containers.
Packaging: Bales

Type of plastic polymer: Acrylonitrile Butadiene Styrene (**O 07 ABS**)
Common origins: Computers and Car Bumpers.
Packaging: Bales and big –bags

Type of plastic polymer: Thermoplastic Polyolefin (**O 07 TPO**)
Common origins: Outdoor applications such as roofing and automotive industry.
Packaging: Bales

Plastic Waste for Sell

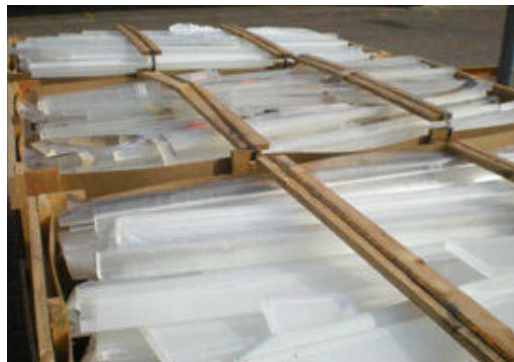

Please find beneath the various products we supply. If you want more information and specifications, please contact our department for this business unit.

Type of plastic polymer: **Nylon** (O 07)

Common origins: Fish Nets.

Packaging: Bales

Type of plastic polymer: Poly methyl methacrylate (O 07 **PMMA/Acrylic**)

Common origins: Automotive industry and construction.

Packaging: Big-bags

Type of plastic polymer: Polyamides (O 07 **PA**)

Common origins: Fibers, toothbrush bristles, fishing line, under-the-hood car engine moldings.

Packaging: Big –bags

Type of plastic polymer: Polycarbonates (O 07 **PC**)

Common origins: Automotive industry and construction.

Packaging: Big-bags

Plastic Waste for Sell

Please find beneath the various products we supply. If you want more information and specifications, please contact our department for this business unit.

Type of plastic polymer: Weee's
Common origins: Electrical and Electronic equipment
Packaging: Bales and Big Bags

Type of plastic polymer: Refrigerators
Granulate
Packaging: Big-bags

Type of plastic polymer: Polystyrene (PS 06)
Common origins: Yogurts origin
Packaging: Bales

Type of plastic polymer: polyethylene (PE 04)
Common origins: Thin Irrigation pipes, Thin Housing Water Pipes, and Thick Construction Pipes.
Packaging: Bales
